Document details

Summary of work undertaken	Derived Ever had Atopy variables
Names of source variables	asth89, asthma, hay89, hayf, allg89, allergy
Output variables	evasthm, evhay, evallerg

Asthma

The variable combines the information on whether they have ever had asthma up to 1989 with information on whether they have had asthma in the last ten years reported in 1999. Binary yes /no variable.

evasthm - Ever had asthma up to 1999?

Derivation

Step1 was to use all the responses given in 1999 to the question [have you had asthma in the last 10 years] only for those people who also had a valid response in 1989.

Step2 was to update the yes category for any who had reported no in 1999 but had reported yes in 1989.

Raw variables used: asth89 asthma

Hay Fever

The variable combines the information on whether they have ever had hayfever up to 1989 with information on whether they have had hayfever in the last ten years reported in 1999. Binary yes /no variable

evhay - Ever had hayfever up to 1999?

Derivation

Step1 was to use all the responses given in 1999 to the question [have you had hayfever in the last 10 years] only for those people who also had a valid response in 1989.

Step2 was to update the yes category for any who had reported no in 1999 but had reported yes in 1989.

Raw variables used: hay89 hayf

Allergy

The variable combines the information on whether they have ever had allergy up to 1989 with information on whether they have had allergy in the last ten years reported in 1999. Binary yes /no variable

evallerg - Ever had allergy up to 1999?

Derivation

Step1 was to use all the responses given in 1999 to the question [have you had allergy in the last 10 years] only for those people who also had a valid response in 1989.

Step2 was to update the yes category for any who had reported no in 1999 but had reported yes in 1989.

Raw variables used: allg89 allergy

Publications

These three derived variables have been used in a published paper: Contribution of functional variation in the IL13 gene to allergy, hay fever and asthma in the NSHD longitudinal 1946 birth cohort.

Variables in this document

5 high-confidence matches

Variable	Label	How it was found
Questionnaire data [55] › Health and medical history [510] › Medical conditions [5101] › Other medical conditions [51011]		
allergy	Have you had any allergies in the last 10 years - at age 43 years	bold token
evallerg	Have you ever had an allergy upto 1999 (age 53 years)	topsheet field
Questionnaire data [55] › Health and medical history [510] › Medical conditions [5101] › Respiratory conditions [51013]		
asthma	Have you had asthma in the last 10 years - at age 53 years	bold token
evasthm	Have you ever had an asthma upto 1999 (age 53 years)	topsheet field
evhay	Have you ever had an hay fever upto 1999 (age 53 years)	topsheet field

3 medium-confidence matches

Variable	Label	How it was found
Questionnaire data [55] › Health and medical history [510] › Medical conditions [5101] › Other medical conditions [51011]		
allg89	Have you ever had an allergy - at age 43 years	prose scan
Questionnaire data [55] › Health and medical history [510] › Medical conditions [5101] › Respiratory conditions [51013]		
asth89	Have you ever had asthma - at age 43 years	prose scan
hay89	Have you ever had hay fever - at age 43 years	prose scan

1 low-confidence match

Variable	Label	How it was found
Questionnaire data [55] › Health and medical history [510] › Medical conditions [5101] › Respiratory conditions [51013]		
hayf	Have you had hay fever in the last 10 years - at age 53 years	prose scan
